

Maya's Sweet Haven - Kitchen Safety & Compliance Manual

1. Allergen Separation Protocol

To prevent cross-contamination, all gluten-free and nut-free items must be prepared on dedicated color-coded prep tables. Purple boards and utensils are for allergen-free prep. Bakers must wash hands and change aprons before switching to allergen-free recipes.

2. Ingredient Storage Rules

All tree nut ingredients (almond flour, walnuts, pecans) must be stored in airtight, labeled containers on the bottom shelf of the dry storage rack to avoid spillages onto allergen-safe ingredients below.

3. Emergency Allergy Response

In the event of a customer reporting an allergic reaction:

- Locate the First Aid Kit in the main kitchen near the emergency exit.
- Call emergency services (911) immediately if the customer shows signs of anaphylaxis.
- Administer the store-provided epinephrine auto-injector if authorized and necessary.
- Report the incident immediately to Maya or the manager on duty.
